AMETEK MOCON INTRODUCES Dansensor® CheckPoint 3 EC HEADSPACE MAP GAS ANALYZER

RINGSTED, DENMARK (June 25, 2020) – AMETEK MOCON -- a leading global provider of package testing instruments, permeation analyzers, and gas controllers/sensors -- today introduced the Dansensor CheckPoint 3 EC, a new portable headspace gas analyzer, providing a quality control solution for specific food applications.

The new portable gas analyzer more accurately measures O₂ or O₂/CO₂ in Modified Atmosphere Packages (MAPs) for packaged products, including red and smoked meats, smoked fish, bread treated with alcohol, fresh pasta, fermented foods, coffee, and applications with high levels of oxygen or combustible gasses.

“Our new Dansensor CheckPoint 3 EC is an innovative instrument, specifically designed for high oxygen, smoked produce, and combustible gas applications. And it comes with the already proven benefits of the Dansensor CheckPoint 3: fast, reliable testing; an intuitive, easy-to-use interface; simple data transfer via WiFi; easy data collection, integration, and analysis with dedicated software and an attractive, ergonomic form” said Steen Andreasen, Product Manager for AMETEK MOCON.

By adding the EC version to the CheckPoint 3 portfolio, we cover all food applications. It’s ideal for productions looking for portability, accuracy, and a low cost of ownership.” said Andreasen.

“We’ve delivered more than 4,000 Dansensor CheckPoint 3 units worldwide since the introduction in 2017,” . “The new gas analyzer offers a valuable upgrade for quality control managers looking for more precise measurements, faster readings, and stable results. The portable unit is so small, the user can hold it in their hands and carry it from one production line to another to randomly test products for quality control.” said Andreasen.

AMETEK MOCON is the world’s leading manufacturer of headspace analyzers and has more than 35 years of experience.
