

AMETEK MOCON **TRAINING & WEBINARS**

Highly skilled, expert operation and application training

PERFORMANCE SERVICES

MOCON PRODUCTS TRAINING & SUPPORT

Industry Leader with Years of Knowledge

MOCON Permeation Analyzers are the most widely used instruments for testing the gas transmission rate of barrier films and packages. AMETEK MOCON pioneered permeation testing technology over 50 years ago and with nearly 10,000 instruments in the field. Along with the largest install base of analyzers, AMETEK MOCON provides an analytical services laboratory operating over 100 MOCON permeation analyzers. Our Service Technicians and Applications Specialists understand first-hand, what it takes to maintain, operate and apply permeation analyzers for your specific needs and applications.

Highly-Skilled Instructors

Our Applications Specialists and Service Teams have over a 100 years of combined work experience on MOCON Permeation Analyzers and have worked with industry leading companies in every market, from converters to consumer package groups. Our instructors have both the technical expertise and the market application experience to help you make your transmission rate measurement accurately and reliably.

Startup and Basic Operator Training

- MOCON Service technician performs setup and verification at customer site
- Training includes sample preparation, software operation, starting a test, and more
- Provide knowledge and understanding for basic operation

Custom Applications Training

- Expert Application Specialists co-develop training plans with you
- Customized presentation materials for reference
- Specific testing for your samples and your instruments
- Ability to test samples prior to training and provide visual aids and protocols
- Available at customer site or AMETEK MOCON facility

Startup and Basic Operator Training

AMETEK MOCON provides free of charge email, phone, web, and video support to all existing and prospective customers. In addition, we offer different levels of training to suit your team's needs.

- Set-up, checkout, and basic operator training
- Additional days for training
- Custom applications training

DANSENSOR PRODUCTS TRAINING & SUPPORT

Every year, AMETEK MOCON presents numerous webinars on trending industry topics, applications, and our instruments, for everyone interested. Our AMETEK MOCON speakers are on ASTM Committees, work with key opinion leaders across various industries, and/or are respected experts in their field. We also invite industry and academic leaders to speak as well. Our speakers lead interactive sessions to answer some of the biggest questions and concerns in the permeation and packaging industry.

Joint AMETEK MOCON & Customer Seminars

Our Applications and Technical Specialists also present at conferences around the world. If you have novel packaging technology or applications you want us to jointly present with you, please let us know. We are always looking for industry trending and novel applications to jointly share with the packaging community.

Important Topics

- Challenges with Permeation/Packaging and Solutions
- Cost Reduction Options for Specific Industries
- Latest Engineering Changes in the Industry
- How to Extend Shelf Life of Packaged Goods
- How to Identify Source of Measurement Problems/Issues

Industry Leader

- Large instrument install base
- Most experience, knowledge, and experts
- Pioneer in permeation and package testing for over 50 years

Interactive Learning

- Ability to ask real time questions to our experts for your specific need
- Understand industry issues and solutions
- Learn about new possible solutions
- Be a part of community learning and discussion
- Become familiar with relevant industry concepts

Access to More

- All previous webinars available upon request
- Understand your markets issues and concerns
- Direct access to our entire network of experts
